services increases economic productivity, public and private organizational operation efficiency,
and enhanced business profitability; and

WHEREAS, the provision and maintenance of equitable access to technology,
broadband Internet access services, digital content, and classroom management tools are
necessary for students, teachers, and school administrators, in order to provide equal educational

FCC’s E-rate program provides discounts on telecommunication and Internet access services to
schools and libraries, based on poverty level; and

qualifying low-income consumers in every state, territory, commonwealth, and Tribal land, and
ensures that all Americans have the opportunities and security that telephone service provides,

neutrality and open Internet access for all.
